

Strong governance and policies support enterprise SDG adherence. Key actions include...

How are AI use cases met?
See **Slide 2** for details.

Industrial use cases rely on regulation for SDG guidance...

Use Cases

- Green fertilisers
- Molecular modelling
- Protein folding
- Route optimisation
- Carbon capture
- Solar cell design
- Power grid optimisation
- Battery design

Enterprises can drive AI for Society by...

- *focusing* on societal change;
- *investing* in innovation to support the United Nations' SDGs;
- *setting* up and implementing accountability throughout the enterprise.

How does the EU AI Act help drive sustainable development?
